Bluvstein Netter, Shirley and Priya Raghurir (2020), "Tip to Show Off: Impression Management Motivations Increase Consumers' Generosity," *Journal of the Association for Consumer Research*, 6 (1), 120-129.

Tipping is ubiquitous in countries such as the United States. Given the importance of examining the experiential side of marketing, we examine tipping—an overlooked participative pricing context and introduce it to the behavioral pricing literature. We propose that consumers use tips as an impression management strategy, tipping more when their goal is to impress others. We examine the robustness of these impression management goals when overall bill totals are small (vs. large, study 1), customers pay using credit cards (vs. cash, study 2), and hold different denominations of cash (study 3), as bill size, and payment modes could attenuate the effect of impression management goals on tipping intentions. These findings allow us to better understand the underlying antecedents
